Philosophy

PROMOT Automation boosts your success with the automation of machine tools.

Promot Automation was founded in Roitham in Upper Austria in 1980. Since then we have specialized in the automation of machine tools, focusing on manufacturers and users with competence in metal cutting.

On the basis of a flexible module system we offer fully automatic and customized handling of workpieces, pallets, and tools. Due to our reliability, competence and long years of experience we see ourselves as our customers' partner, promoting their success with a lasting effect.

Workpiece Handling

Gantry Loader LP / Robot Cell RZ / Cellmaster CM /
Material Flow Solutions

Gantry robots and robot cells are key elements in the automation of machine tools. Offering a great variety of magazines and auxiliary stations we provide customized overall solutions.

Vision

PROMOT Automation is the acknowledged leading brand for the automation of machine tools.

We have the most comprehensive and versatile module system currently available on the market for gantry robots and robot cells. This is the basis for our broad product range. Thus we can offer our customers integrated and complex solutions for all tasks in the automation of machine tools. This is clearly shown by more than 5,000 implemented projects – and counting.

Pallet Handling

Palmaster RZ / Palmaster RL / Palmaster SL /
FFS Palmaster / Toolmaster / Palmaster Prosys

Our product series “Palmaster” makes pallet handling both efficient and easy. For the automation of stand-alone machines up to flexible manufacturing systems for several machines. Ideal especially for small to medium batch sizes.

Customer benefit

**Individual solutions are our strength.
Highest quality standards form the basis
for our products and processes.**

Consequently, we are certified according to the quality management system ISO 9001 as well as to the international environmental management standard ISO 14001. With a view to an honest, open and efficient environmental policy we focus on the continuous and lasting improvement of our environmental performance.
